

Web Scraping Full Notes

1. Basic Concept:

List Page -> Detail Page -> Data Extraction

2. Home to Detail:

- Collect links from homepage
- Visit each link
- Extract data

3. Pagination:

- URL `████████` (?page=1,2,3)
- Next button
- Infinite scroll (API `████████`)

4. Scrapy Flow:

`parse()` -> collect links

`parse_detail()` -> extract data

next page -> repeat

5. Key Function:

`response.follow()` -> handles URL automatically

6. Common Problems:

- Wrong selector
- Missing data
- JavaScript rendering

7. Tips:

- Use inspect tool
- Use scrapy shell
- Handle pagination properly

Final:

Page -> Links -> Detail -> Next Page -> Repeat
